For *Dysmilichia bicyclica phaulopsis* BRANDT, 1938 stat. nov. etc..read:

*Dysmilichia phaulopsis* BRANDT, 1938 (Pl. 306, Figs 2, 3)

*Dysmilichia phaulopsis* BRANDT, 1938, Entomologische Rundschau . 55: 549, fig. 159. L. t.: Iran Dalaki

**Note:** Figured by FIBIGER & LEGRAIN (2009, pl. 158, adult); male and female genitalia of the taxon *phaulopsis* are specifically slightly different from those of *D. bicyclica*, and so it is not downgraded to subspecific level. Specimens of *D. mira* from Iran were erroneously labelled by BOURSIN as *phaulopsis*. Male and female genitalia Pl. 138, Figs g-h.

**Distribution:** *D. phaulopsis* is restricted to S Iran and the adjacent parts of Oman and UAE; specimens from the Arabian Peninsula are on average slightly larger with paler hindwings.

Oman \*10/2011; \*9/2011; 1 ♀, "Prov. Batinah, Al Awabi vic., Wadi Bani Awf, 29.-30.xii.2009, 430m, N 23°20'01", E 57°29'23.5" (gen.prep. H. HACKER 22893 ♀) (leg. BITTNER, LEHMANN & STADIE)" (coll. D. STADIE); 1 ♂, "östl. Hadjar, 113 km NE Sur, 430m, N 22°23.6', E 59°01.0', 26.xii.2003 (gen.prep. H. HACKER 24581 ♂) (leg. GÖRGNER)" (coll. GÖRGNER); 1 ♀, "westl. Hadjar, Nizwa, 15 km westl Ghol, 870m, N 23°07.5', E 57°14.4', 18.xii.2003 (gen.prep. H. HACKER 24585 ♀) (leg. GÖRGNER)" (coll. GÖRGNER);

UAE LEGRAIN & WILTSHIRE, 1998; FIBIGER & LEGRAIN, 2009; 2 ♂♂, "Masafi, 500m, 18.-27.x.1995 (gen.prep. H. HACKER 24588 ♂) (leg. A. LEGRAIN & E. STASSART)" (coll. A. LEGRAIN); 1 ♀, "Al Jabal al Akhdar, nördl. Al Hotta Cave, 23°05'41.0 N, 57°23'40.4 E, 21.ii.-2.iii.2011 (leg. St. SCHELLHORN & P. SCHNITZER)" (coll. D. STADIE);

Iran BRANDT, 1939; REISSER, 1958; HACKER & KAUTT, 1999; HACKER & MEINEKE, 2001; EBERT & HACKER, 2002; 2 ♂♂, "70 km S. v. Teheran, 1300m, 5.v.1965 (gen.prep. H. HACKER 24573 ♀, 24576 ♂) (leg. KASY & VARTIAN)" (ZSM).

**Bionomics:** *D. phaulopsis* is a winter species, on the wing from December to March. Early stages unknown.
